

LaCie 324 LCD Monitor

24" Wide Gamut Display For Creative Professionals

**True To
Your Vision**

Premium Image Rendering

The LaCie 324 is equipped with an industry-leading wide-gamut S-PVA panel that covers 95% of the Adobe RGB gamut and 99.7% of ISO Coated. This large range of vibrant colors, previously unattainable on LCD monitors, ensures your artwork is as colorful as you can imagine. Thanks to its embedded 10-bit gamma correction, the LaCie 324 calculates color transitions with twice as much precision as regular 8-bit monitors. The result is it offers smoother renditions of gradients and minimizes banding.

State-of-The-Art Calibration Solution

The LaCie blue eye pro software and colorimeter (available bundled or separately) perform single-click hardware calibration of your display and produce an advanced ICC profile that ensures color consistency throughout your workflow. LaCie blue eye pro is a full-featured color management tool that is simple to use, fast and precise. Its Test & Report function allows you to verify that calibration is and stays accurate. Advanced features, such as manual fine-tuning, reference profile matching and colorimetric environment switching help you achieve an even closer match between captured, displayed and printed colors.

Perfect For:

- Graphic & Multimedia Design
- Photography, Illustration, Layout
- Music & Video Editing
- 3D CAD & Game Development

Full HD Video Performance

The LaCie 324 also performs flawlessly with video up to and including Full HD 1080p sources. With its embedded DCDi[®] by Faroudja** and TrueLife[™] video technologies, you can be sure video content appears at its best. It offers not only conventional VGA and DVI inputs, but also two HDCP-compatible HDMI ports for a maximum of four simultaneously connected video sources and 2 simultaneously displayed sources through its Picture-in-Picture feature.

Ideal For Your Work Environment

Designed to optimize your work environment, the LaCie 324's large 24" diagonal and 16:10 format enhance productivity and allow full 1:1 scale display of two letter-sized or A4 pages with extra space for toolbars. Its USB 2.0 hub and headphone port are conveniently within reach so you can easily connect your peripherals. All monitor controls are easily accessible through the monitor's touch-sensitive interface. For professionals working in the brightest environments, the optional easyHood simply clips into a stable position where it blocks out ambient light.

- Smooth and brilliant color rendering
- DCDi[®] by Faroudja** video performance up to 1080p & TrueLife[™] video
- 4 inputs, Picture-in-Picture mode
- Convenient USB hub and headphone port

Features

- Wide gamut 24" S-PVA LCD panel
- Expansive 1920x1200 resolution
- Brilliant 1000:1 contrast ratio
- Wide 178° viewing angles
- VGA, DVI & 2 x HDMI input ports
- Supports up to 1080p video signals
- HDCP full compatibility with Blu-ray & HD-DVD
- TrueLife™ Video shape and detail enhancement
- Adaptive contrast, block noise & 3D noise removal
- 4 zoom modes including smart upscaling
- 3-port USB 2.0 hub & audio port
- Touch sensitive control interface
- Optional blue eye pro software & colorimeter

LaCie 324 LCD Monitor with hood and colorimeter

	LaCie 324 LCD Monitor	LaCie 324 LCD Monitor + calibration software & hood	LaCie 324 LCD Monitor + calibration software, hood & colorimeter
Item Number	130778	130780	130781
Diagonal	24 in. / 61 cm		
Display Area (HxV)	20.41 x 12.75 in. / 518.4 x 324 mm		
Aspect Ratio	16:10		
Maximum Resolution	1920 x 1200		
Dot Pitch	.01 in. / .27 mm		
Gamma Correction	10-bit		
Color Gamut	92% of NTSC		
Luminance	400 cd/m2 (Center, typ.)
